Task 2

- Build a flash sale page that counts down from 120 seconds to 0.
- After the countdown is down a message is displayed to the user with the sale link.
- After 5 seconds of showing the message the user is redirected automatically to amazon.com to find the sale page.
- **Bonus: Display the countdown in [mins]:[secs] format, and add Reset button to reset the countdown.**

Flash Sale Countdown

103 seconds

Flash Sale Countdown

Flash Sale has started! [Shop now](#)

Task 3

- Before submitting the form validate it first:
 - Username should not be empty and accept only letters and space.
 - Email should be valid format.
 - Password should be between 4 and 12 characters and doesn't allow space.
 - Confirm Password is the same as password field.
- Prevent form submissions and show errors if exists (otherwise submit the form).
